

BADMINTON SCHOOL

Supply and installation of Recycled Plastic Play Equipment!

Having completed a previous installation of Recycled Plastic play equipment and PlayBond surfacing, we were asked by Badminton School to replace the rotten timber play frame that had come to the end of its life.

Given the area of the existing Woodchip pit, it was agreed that our Low Play 3 multi-play frame in Recycled Plastic was the best item to install in this area – along with the PlayBond safer surfacing.

We also supplied and installed an MOT stone sub-base under the PlayBond to assist in levelling the area and helping in the drainage of surface water too.
