

THE TRINITY PRIMARY SCHOOL, LIVERPOOL

Twin House Activity Centre, and Steam Train Set!

We were contacted by The Trinity Primary School in Liverpool to discuss their requirements for a new piece of play equipment for their school. They did not want timber for their new play equipment so it was agreed that Recycled Plastic was the material to be used.

Having discussed their requirements at a meeting at the school, we agreed that our Twin House Activity Centre would be the ideal item for the area – installed in such a way that additional items can be added to the trail element when additional funds become available.

We also supplied and installed a Steam Express Train Set and Carriages onto a block paving area.

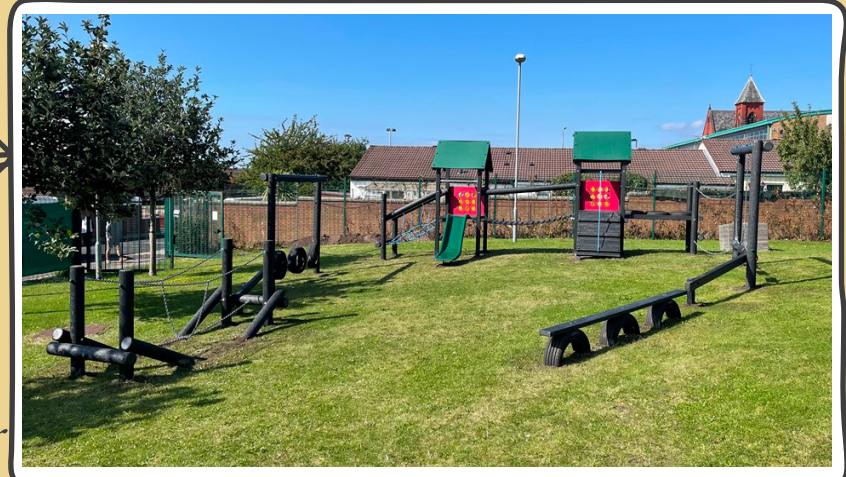

Installed in August 2021

Value – £16,987 + Vat
